

28 April 1964

TO: Deputy Director of Logistics

SUBJECT: Relocation of Cargo Branch, Transportation Division

1. The Planning Staff submitted a study on 14 February 1964 which recommended among other things that the Cargo Branch of the Transportation Division be physically relocated to the [REDACTED]. This study was given to the Chief, Transportation Division, for coordination. He submitted a proposal that a transportation section ([REDACTED]) should exist at [REDACTED] under the Transportation Division. He did not state what the overall function of this section was proposed to be. We recommended to Mr. Garrison that the proposed relocation of the Cargo Branch be approved dependent on the availability of office space and considering the cost of relocation.

2. We now have a memorandum to the Director of Logistics from the Chief, Transportation Division, dated 28 April 1964, (attached) in which Transportation Division puts forth a number of previously well massaged and certainly debatable reasons as to why the Cargo Branch should not be relocated to [REDACTED].

3. I understand that Mr. Garrison has instructed the Chief, Supply Division, to prepare a proposal under which the function for booking and otherwise arranging for the movement of cargo to and from [REDACTED] be made a responsibility of [REDACTED] Chief under the Chief, Supply Division, and that this proposal should include a statement of personnel required.

4. I suggest that no consideration be given to or action be taken on the attached memorandum from the Chief, Transportation Division, until the proposal mentioned in paragraph 3 above has been received and considered by the Director of Logistics.
